**Note: Use metric weight & volume measurement for better control of ingredients. The U.S. measurements are an approximation of the metric measurements.**

### Method:

1. Partially freeze the meat and then grind through the coarse plate --3/8 inch (9.5mm).
2. Add remaining ingredients with the meat and mix very well.
3. Stuff into artificial or natural casings, pricking air holes in casing.
4. Hang in smoker (no smoke) at 90°F (32°C) for 3 hours to cure
5. Poach in 190°F (88°C) water to an internal temperature of 160°F (71°C)...approximately 1 hour and 20 minutes.
6. Shower in cold water to reduce to room temperature and then dip sausage in boiling water for 1 minute to shrink the casing.
7. Let hang in air several hours to bloom; refrigerate before eating.

*Note:  
This sausage is generally eaten at room temperature, sliced thin, and served with cheese, baguette and red wine.*
